

Small site Categories

The following categories have been taken from Natural Englands Small Sites Metric. These are a simplified version of the Biodiversity Metric 3.0. It has been specifically been designed for use on small development sites:

- 1) Development sites where:
 - For residential developments the number of dwellings to be provided is between one and nine.
 - Site area is less than 0.5hectares or less than 5,000sqm
- 2) Where there is no priority habitat present within the development area (excluding hedgerows and arable margins).
